DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-16, drawn to coupons, classified in class 705, subclass 14.
- II. Claims 17-22, drawn to electronic shopping, classified in class 705, subclass 26.
- III. Claims 23 and 24, drawn to a computer with display means, classified in class 715, subclass 736.
- IV. Claims 25 and 26, drawn to a managing apparatus classified in class 707, subclass 1.
- V. Claim 27, drawn to a portable terminal classified in class 455, subclass 403.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I-IV are related subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as coupon authentication. Invention II has separate utility such as purchasing goods and services over the internet. Invention III has

separate utility such as monitoring computer performance. Invention IV has separate utility such as a server. Invention V has separate utility such as accessing the internet from a mobile phone.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
